

Environmental Policy

Blackbourne Integrated M&E recognises that good management includes all environmental matters and will ensure that environmental protection and the prevention of pollution are part of all decisions, policies and practices. The Company shall endeavour to work towards the following objectives:

- Environmental Management Programmes will be devised continually for our business premises, activities associated with improvement and maintenance projects, and all related future project programmes.
- Comply with relevant environmental legislation, regulation and industry codes of practice.
- Make the environmental Policy widely accessible by displaying the Policy in all our business premises, by making it available from Head Office, by publication in the Annual Report and inclusion in the employees' hand book.
- Provide for the setting and achievement of Environmental Objectives and Targets for Blackbourne Integrated M&E and displaying the programmes prominently within the business premises.
- Maintain efforts to achieve continual improvement in the environmental performance of Blackbourne Integrated M&E by maintaining ISO 14001 accreditation.
- Encourage Reduction, Re-use and Recycling of waste and ensure the proper disposal of Controlled Waste and Special waste.
- Facilitate communication with all Directors of Blackbourne Integrated M&E, Sub-Contractors and Suppliers regarding our Environmental Policy, Performance, Objectives and Targets.
- Blackbourne Integrated M&E will promote the principles of sound environmental performance by actively encouraging others to introduce their own policy and environmental management systems.
